

EVA
MODULAR SYSTEM

MOSELLA UK

BUILD YOUR OWN SYSTEM:

FEATURES:

We now have a comprehensive range that cover your needs for most situations.

You can purchase "Sets" or you can build a bespoke system that suits your style of fishing. For example; you can have one trolley bag with a set for commercials, one for Rivers and one for natural venues such as Tamar. It's very easy to be organised and spend more time fishing. Great if you fish festivals.

The "100" series Trolley bag can be purchased on its own or in a 14pc set (EMS120) that has a very versatile selection of storage containers. These can be used to store dry baits such as pellets, hook boxes and a huge range of accessories.

EMS 120

Place any spare hooks or accessories you need in the lids mesh pouch.

The White "200" series is primarily a bait station but can be used to store accessories.

The White "300" series features the "Side vent Live bait system" that will keep live bait dry in wet weather.

The White EVA is the optimum colour to protect your bait from heat

Designed and tested in the UK by Vic Bush and the team at Mosella UK.

EMS 200

EMS 300

EMS - ERGONOMIC MODULAR SYSTEM

NEW FEATURES:

• THICK EVA

Ultra rigid, durable and waterproof, that offers excellent protection of valuable tackle that stays firm and dry when stacking.

• OVERSIZE ZIPS

Large, strong zips for easier access.

• ERGONOMIC CARRY HANDLES

Ergonomic handles that are strong and comfortable when carrying loaded bags.

• MOULDED LIDS

All moulded lids have been designed to offer extreme protection in adverse weather conditions.

It has a full zip meshed pouch on the inside for extra storage.

• MOULDED BASE

Trolley bags with strong moulded base with feet

• SIDE VENTS

Great innovation for carrying live bait as these containers are fitted with side vents as opposed to normal mesh lids that let in water during adverse weather.

• CARRY STRAPS

Removable padded shoulder strap.
